

1. INTRODUCTION

The objective of this documentation is to guide TP users on how to configure the TP wireless SSID “**TP-SURF**” on laptops running Windows 8 and Windows 10 Operating System.

2. REQUIREMENTS

What you will need to connect to TP-SURF Wireless Network.

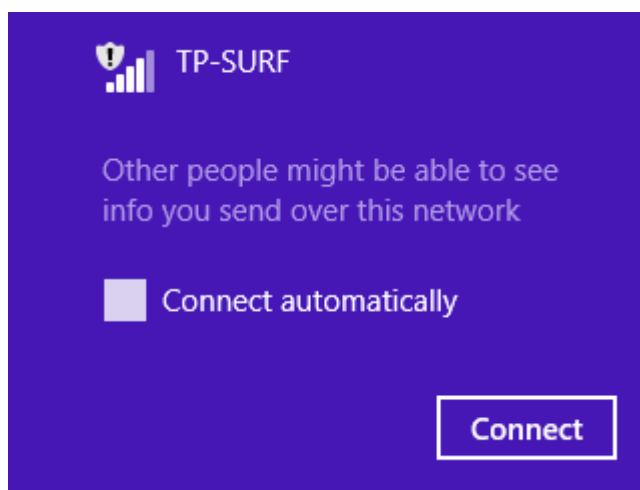

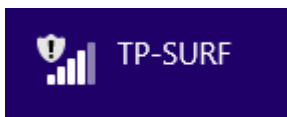

To connect to **TP-SURF** Wireless Network, you will need:

- A laptop or Wi-Fi enabled mobile device.
- TP-SURF credentials or TP STAFF account

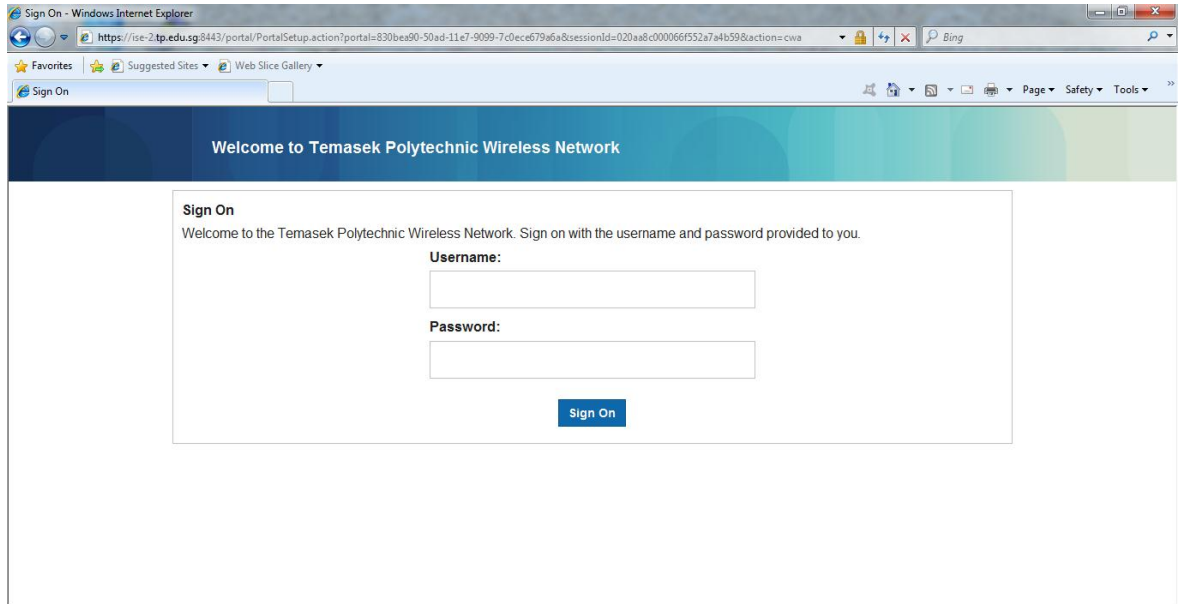

3. CONFIGURATION OF WIRELESS SETTING

3.1 User Guide for Connecting to TP-SURF SSID

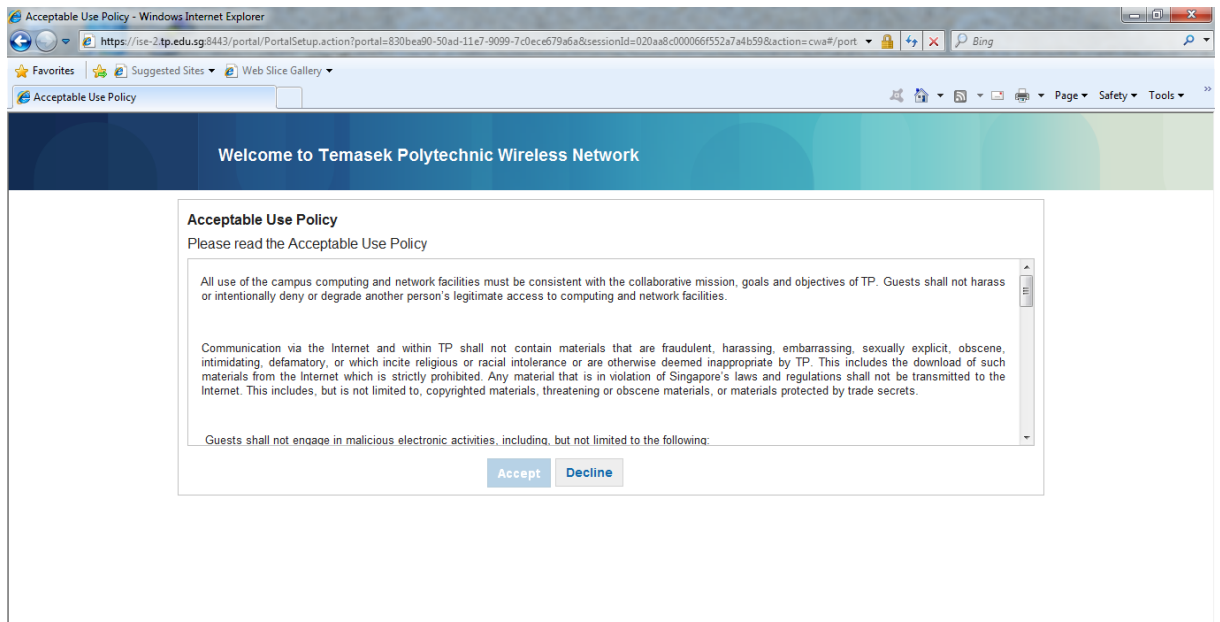

- 3.1.1 Click on the wireless icon  in the bottom right corner to see the list of available SSIDs. Select **TP-SURF** and click “**Connect**”.

- 3.1.2 Once you are connected to **TP-SURF**, the laptop will receive the IP address automatically. Open any browser and try to access the URL “www.tp.edu.sg”. In the next few seconds, you will be automatically redirected to the page as shown below. Enter your **username** and **password** and click **Sign On**.

- 3.1.3 Once you sign in successfully, you will be presented with the “Acceptable Use Policy” page as shown below. Read the terms and conditions and click ‘**Accept**’.

3.1.4 Once you have accepted the “Acceptable Use Policy”, you will be redirected to TP home page. You can now access the Internet.
